

CONSIDER THIS

Would we allow ice cream to be sold if it contained more than 50 substances that cause cancer?

TOBACCO SMOKE CONTAINS: nicotine, benzene, lead, hydrogen cyanide, acetone, chromium, arsenic, formaldehyde, carbon monoxide, vinyl chloride and about 8,000 others substances, including at least 50 that cause cancer.

Tobacco companies are selling a product that kills every second user prematurely. In Sweden, 32 people die every day from smoking.
